

Articulation and Transfer:
Utilization of Feedback Reports (2-year Colleges and technical Colleges)

Southeastern Louisiana University

Southeastern provided data for all students who transferred from Delgado, since only a small number of the students who transferred did so after completion of the Associate degree. For the 2009 – 2010 Academic Year, Southeastern reports 188 students transferred to Southeastern from Delgado. Of this total, twenty-five (25) students transferred after completion of Associate degree awarded from Delgado.

Delgado students who transferred to Southeastern had an average Grade Point Average (GPA) of 2.348 for their first semester and an average cumulative GPA of 2.512. No data regarding student graduation with baccalaureate degree were provided. In reviewing the grades of Delgado transfer students for Math and English, the percentage of students who completed Mathematics courses with a final grade of A, B or C, was 46 percent and the percentage of students who completed English courses with a final grade of A, B, or C was 53 percent.

Data were not provided as to how this information compares to non-transfer student performance at Southeastern. Results of the report were forwarded to the College's [General Education Assessment Committee](#) to determine strategies to improve student performance and/or revise instructional content in core General Education as necessary.
