MESSAGE FROM VICE CHANCELLOR FOR ACADEMIC AFFAIRS & PROVOST

At Delgado Community College, the Program Review process focuses departmental planning, review and goal setting on supporting our College Mission. One of our ultimate goals is to sustain continuous quality improvement in every department—instructional and non-instructional—thus improving our students’ chances of success.

Program Review provides an opportunity to review, analyze, and assess the content, quality and sustainability of a program with respect to student learning outcomes and the student experience at Delgado Community College. It fosters academic excellence, helps programs determine how to raise the quality of its offerings, and provides guidance for faculty and administrative decisions in support of continuous future improvement. At its heart, program review brings about program improvement through the collection of evidence about the quality and effectiveness of programs, through shared reflections and collegial dialog about the program’s current quality and future direction, and through constructive feedback during peer and administrative review. Program review serves college and system strategic planning efforts, technology planning, staff development, and other efforts aimed at improving student achievement and learning. Decision-making processes, including those affecting resource allocation, and hiring of full-time faculty rely on program review as a basis for evaluating program requests.
