ENROLLMENT SERVICES COUNCIL

Function of the Enrollment Services Council

The Enrollment Services Council focuses on improving the year-round enrollment experience, working to support continuing students and new applicants with enrolling in courses and being ready for the first day of each term. This will involve reviewing and ensuring that all communications, enrollment event planning, policies, procedures, and practices are student-centered. The Council will use data and documented student experiences to drive decisions and recommendations. The Council makes recommendations, and serves as an advisory group, to the Academic and Student Affairs Council. The Enrollment Services Council also serves as a vehicle for deliberating and conveying enrollment services recommendations and practices.
